Kellie Matteson

Full-Stack Developer

About me

I'm an actor who codes. An easy fit for me because both require breaking into the unknown. When crafting a character, I sift through the script and use trusted technique to pull it together. As a developer, I turn to my favorite tools, Javascript, React and Ruby, to tease out effective functionality and creative, thoughtful solutions.

Skills

JavaScript | React.js | jQuery | HTML5 | CSS3 | Bootstrap | Express | Node | Ruby | Ruby on Rails | PostgreSQL | MongoDB | Mongoose | GitHub | PostMan | Heroku | Wordpress | Sass | AJAX | Axios | Git

Software Development Projects

October 2020- PRESENT

Bringing Up Baby- *2 player console question& answer game to see if the player can survive life with a baby*

- Built with HTML, CSS, JavaScript and jQuery
- Used animation in CSS to float features across the game space
- Made a function to track a win/lose state and keep score

Tweeter- *Twitter reimagined group project*

- Utilized GitHub to work collaboratively and effectively as a Team
- Built a Ruby on Rails back end and a React.js front end
- Deployed to Heroku and styled using Sass and Bootstrap

Recipe App- *Full MERN stack App pulling recipes from an API allowing the user to store them for later and make notes*

- Built a full CRUD app using Restful Routes to an external API
- Added flexbox and styled animated cards to hold new recipes
- Used Node.js, MongoDB/Mongoose, Express and React.js

The Give App- *Turned Buy Nothing FB Group into a Share App to help reduce, reuse and recycle our goods*

- Developed this idea from start to finish with wireframes and Trello boards
- Built a full CRUD app with Ruby on Rails backend and React.js frontend
- Incorporated PostgreSQL
- Used Bootstrap and Sass for styling
- Added authentication with JWT
